Thank you for contributing to a more sustainable future as the proud owner of an electric car. Purchasing a charging station would be the next step in your journey to a greener world.

Charging stations are safer and more sustainable for your home's and car's energy capacity. Naturally, they guarantee a fully charged car, every time you go out.

Based on the things you'll most likely be dealing with, this guide walks you through the easy process of choosing the charging station that best matches your needs as an individual house resident.

YOUR NEEDS

Charge fast and safe from home

We promise you a faster, safer and more durable charging experience with the help of Rexel's expansive network of qualified installers that set up the best compatible charging station with your home's and car's capacity.

A fully charged car, at home and on the go

Our charging cards and key fobs enable you to use our charging stations at home, on the go, and even abroad.

Settle my charging costs

We offer you insights into your charging sessions and enable you to easily settle your home charging costs with your employer or fleet owner.

OUR SOLUTION

- ✓ **HOMELINE** charging station with a type 2 socket or a fixed 6m cable
- ✓ **INSTALLATION** by Rexel recommended installers
- ✓ **ONLINE SUBSCRIPTION** to automatically settle your charging costs
- ✓ **PERSONAL CHARGING CARD OR KEY FOB** to charge wherever you go

HOMELINE CHARGING STATION

The HomeLine is available with a **type 2 socket** or a **fixed 6m cable**, mounted on a pole or onto the wall. With a type 2 socket (a European standard), your charging station will be compatible with all electric car models. With a fixed **6 meters** cable, you start each charging session instantaneously and with ease, in any parking position possible.

INSTALLATION

Fast and safe installation is taken care of by Rexel recommended installers, who match the right type of charging capacity with your power supply at home.

ONLINE SUBSCRIPTION “HOME”

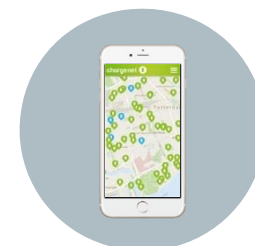

With the “Home” subscription to our cloud-based management system, **BackOffice**, you can keep track of your charging sessions and request us to automatically send invoices of your charging costs to your employer and/or leasing company.

CHARGING CARD / KEY FOB

With a personal **Charging Card** or **Key Fob**, you're able to start and stop your charging sessions, at home and on the go.

CHARGENET APP

The free **ChargeNet app** allows you to locate charging stations, and it allows charging card-holders to track each personal charging session in real-time.

YOUR BENEFITS

“fast & safe”

In contrast to a regular electricity outlet, our charging stations have the ability to charge up to 8 times faster, and are safer for your car and home, as they are tailored to your home's power capacity. With their online connectivity and durable build, they require very little maintenance and can be updated remotely.

“convenient & sustainable”

Our BackOffice enables you to automate the billing of your charging costs with your employer or leasing party, which saves you lots of time and administration. Available in different power capacities, our charging stations utilize your home energy supply as efficient and economic as possible.

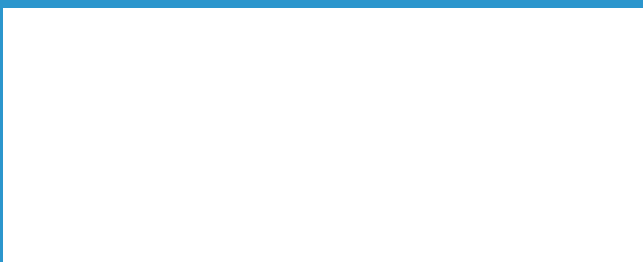

“cost & energy efficient”

Our charging stations can be updated online and enhanced remotely, which saves you from unnecessary maintenance costs. When not in use, our charging stations leave minimal energy foot prints.
